## Introduction

This document gives a historical record of the changes made to the dataset since its initial release. It will also contain, if applicable, a list of known errata that will be updated in the next release of the dataset. We encourage scholars using the data to always use the latest version available if possible, but provide this list as a reference point as to whether or not an upgrade from a previous release of the data is necessary for a particular analysis.

Please note that the errata listed here should not be considered an exhaustive list of changes for the upcoming version, as newly discovered errors may be added at any time.

### ***Misc. Changes***

#### *General*

- Actors registered on Side B have been specified as a result of the creation of the UCDP Dyadic dataset.
- Major changes have been made to practice of coding startdates. Startdate still denote the first battle-related death in the conflict, but unlike in previous versions of the data, the startdate never changes. Thus, even if there is a complete change on side B, the startdate remains the same, serving as an indication of when the conflict as a whole first resulted in a battle-related death. While the column Startdate2 remains, the data coded here is altered. Instead of providing information of the date when the conflict *for the first time* reached 25 battle-related deaths, it now gives the date, as precise as possible, when the *latest episode of conflict activity* reached 25 battle-related deaths. This was previously coded under EpisodeStartDate. For more information on this, see the UCDP/PRI Armed Conflict Dataset Codebook.
- Apart from changes in the *practice* of coding startdates, major revisions have been made to both startdates and startdate2, as the variable has been thoroughly scrutinized.
- Groups previously called “Military faction” have been re-named in an effort to make their names more informative. As a rule of thumb our first option has been to use the name of the coup leader(s): Military faction (forces of xx).

### 3 Changes from Version 4-2006 to 4-2006b

Some of the changes reported in the 4-4006 release were incorrect and have been changed back to the values reported in 3-2005b. These are mainly values set for start dates and related precision coding. There are some inconsistencies between the coding criteria for start dates in the code book and the actual dates reported in the dataset. These inconsistencies are going to be addressed in the next version of the dataset.

## 4 Changes from Version 3-2005b to 4-2006

There have been made several changes to the dataset from version 3 to version 4.

A new ID for conflict has been introduced and the old fields; Primkey, ID and SubID have been removed. The main conflict table is unique on the combination of ID and Year. It is still possible to calculate “Sub Conflicts” based on changes in type and years without conflict. We are working on how to indicate major changes in the opposition side which at a later stage can be used to infer sub conflicts.

Side\_A and Side\_B have been split into four variables to indicate the difference between main and supporting actors. For a more thorough explanation, see the codebook.

The Intensity variable has been simplified into categories 1 and 2 (down from three categories). Value 1 is indicating battle deaths accumulating to  $\geq 25$ . Value 2 indicates battle deaths accumulating to  $\geq 1000$ . A new variable, Cumulative Intensity, has been introduced to indicate if the conflict so far has accumulated  $\geq 1000$  battle deaths.

The variables geo-referencing the conflicts have not been updated and are therefore not included in this years version of the dataset.

Changes made to the coding of individual observations are documented below:

## 6 Changes from Version 3.0 to 3-2005

With this release the dataset has been updated with new data for the year 2004. Some changes have been made to the dataset, particularly concerning the start dates. In an effort to ensure that the onsets of conflicts are coded in the same way in the PRIO/Uppsala dataset and in the UCDP online database ([www.pcr.uu.se/database](http://www.pcr.uu.se/database)), the start dates have been compared and investigated more in-depth.

## 7 Changes from Version 2.1 to Version 3.0

With this release the dataset has undergone substantial revision. Due to the changes in our data structure we will not list the affected observations from the old format. However, we do provide an overview of the changes for your reference. We encourage all researchers who wish to update to Version 3.0 to download the appropriate file(s) in their entirety.

The changes are recorded under five different headings: firstly, conflicts that have been completely removed from the dataset are listed; secondly, conflict years that have been excluded are listed; thirdly, new conflicts, previously not included in the dataset, are listed; fourthly, new years of conflict activity are noted; lastly, all other types of miscellaneous changes, e.g. changed SubIDs and changes in names of opposition organisations, are listed.

Apart from these changes, two further things are important to note. First and foremost, the structure of the dataset has been modified and is now in a conflict-year format. Important to note is also that the information given for the post-1989 period is more precise in the revised version. In version 2.1 of the dataset, information on the exact years that an opposition organisation was active was not available. In version 3.0 we have been able to provide a more precise coding of side B due to the new format of the dataset. Unfortunately, the information is not yet as detailed in the period 1946–1988.

## 12 Changes from Version 1.0 to Version 1.1

- The monadic file did not include observations for Afghanistan for the years 2000 and 2001. These have been added, and the two relevant lines now read:

COW	Year	Type1	Type2	Type3	Type4	Location	Count	Version
700	2000	0	0	3	0	3	1	1.10
700	2001	0	0	3	0	3	1	1.10

- The table IntlSystem in the main database has been updated so that Afghanistan remains in the international system by 31 December 2001 instead of leaving it on 30 December 1999.
- Some geographical data have been corrected in the table Armed Conflicts in the main database. The new observations are listed in the table below:
