

UCDP Battle-Related Deaths Dataset

Version history 5-2014¹

¹ The latest version of this document can always be found at the dataset web page at http://www.pcr.uu.se/research/ucdp/datasets/ucdp_battle-related_deaths_dataset/

Introduction

This document gives a historical record of the changes made to the dataset since its initial release. It will also contain, if applicable, a list of known errata that will be updated in the next release of the dataset. We encourage scholars using the data to always use the latest version available if possible, but provide this list as a reference point as to whether or not an upgrade from a previous release of the data is necessary for a particular analysis.

Changes from Version 5-2013 to 5-2014

Two versions of the dataset

In previous versions of the dataset, the dataset file has contained both conflict- and dyadic level of the data in two different sheets. In v.5-2014 these two have been separated into two different files, one for dyadic data, UCDP Battle-related Deaths Dataset v.5-2014 Dyadic, and one with conflict level data, UCDP Battle-related Deaths Dataset v.5-2014 Conflict.

A note on Dyad IDs

In order to reduce the risk of confusion and mistakes when using the UCDP Battle-related Deaths Dataset together with other UCDP datasets a minor alteration of the Conflict IDs has been made. All conflicts have received a new Conflict ID beginning with 1- followed by the old Conflict ID. For example Conflict ID 137 is now Conflict ID 1-137. In UCDP data 1 stands for state-based conflict, 2 stands for non-state conflict and 3 stands for one-sided violence.

New variable added to conflict dataset

A new variable called DyadID has been added to the UCDP Battle-related Deaths Dataset v.5-2014 Conflict. The variable lists all the dyads that were active in a particular conflict-year, separated by a comma (,)
